Overview

Welcome to the homepage of FileZilla®, the free FTP solution. The *FileZilla Client* not only supports FTP, but also FTP over TLS (FTPS) and SFTP. It is open source software distributed free of charge under the terms of the GNU General Public License.

We are also offering *FileZilla Pro*, with additional protocol support for WebDAV, Amazon S3, Backblaze B2, Dropbox, Microsoft OneDrive, Google Drive, Microsoft Azure Blob and File Storage, and Google Cloud Storage.

Last but not least, *FileZilla Server* is a free open source FTP and FTPS Server.

Support is available through our [forums](#), the [wiki](#) and the [bug and feature request trackers](#).

In addition, you will find documentation on how to compile FileZilla and nightly builds for multiple platforms in the [development](#) section.

Quick download links

Download FileZilla Client
All platforms

Download FileZilla Server
Windows only

Pick the client if you want to transfer files. Get the server if you want to make files available for others.

Click "Download FileZilla Client"

Show additional download options

Installation

Double click and run the FileZilla installation package you downloaded above.

Click "I Agree" on the License Agreement.

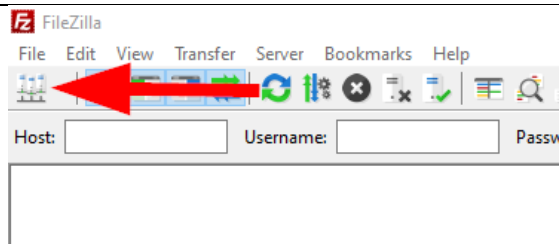

Note: If prompted to install any additional software select DECLINE and then Next.

Configuration

Once installation has completed you should see a shortcut on the desktop for FileZilla or by clicking the Windows button and simply typing "Filezilla"

Add a connection through Site Manager by clicking the Site Manager button or going through the File menu and selecting Site Manager.

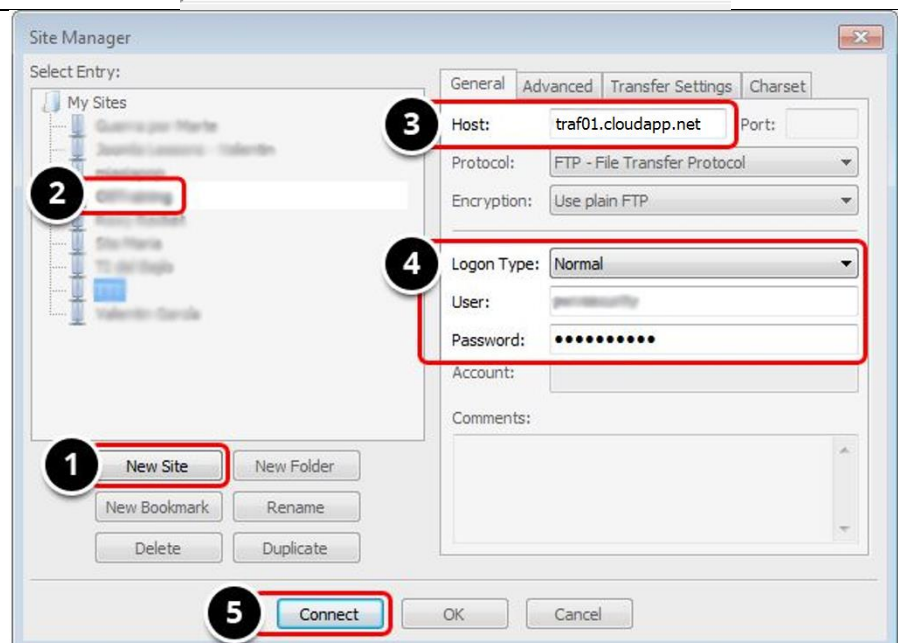

Adding a Site to Site Manager do the following:

1. Click New Site.
2. Add a custom name for this site. (*Descriptive name for this saved connection.*)
3. Add the Host – traf01.cloudapp.net

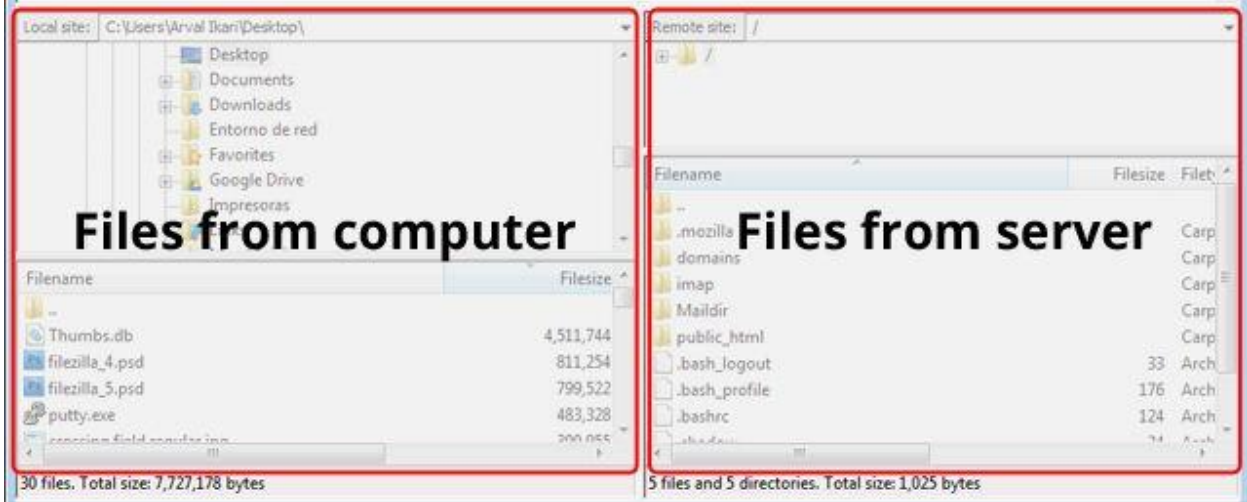

Change the Protocol – SFTP – SSH Transfer Protocol

4. Set the Logon Type to "Normal" and insert your FTP username and password.
5. Press the "Connect" button

Uploading and Downloading Files to the FTP Server

The FileZilla file manager will show files from your local computer on the left side of the screen, and files on the remote server (the FTP server) on the right side of the screen.

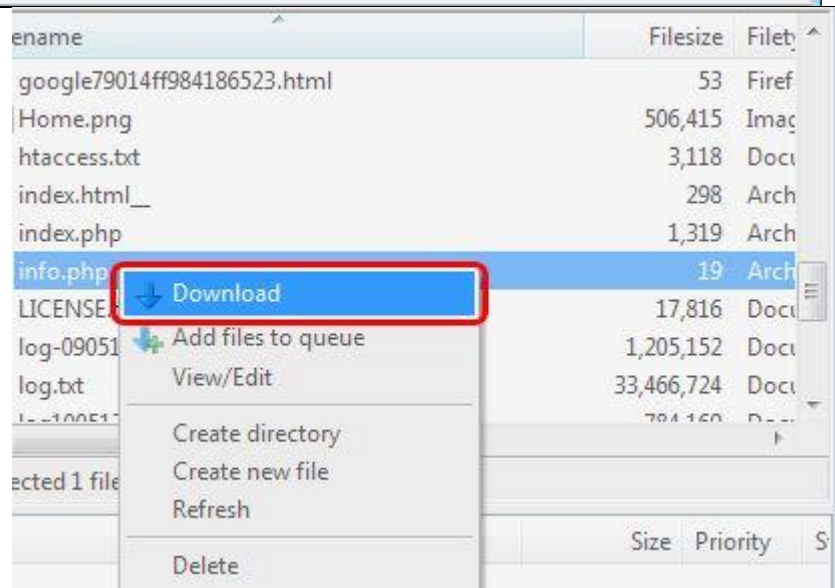

Downloading Files:

To download a file from the remote FTP server, right click on the file and select Download.

Note: You can select one or multiple files to download at a time. Drag and Drop is also supported.

Files downloaded from the right will be saved into the selected directory on the left.

Uploading Files:

To upload a file from the local computer, right click on the file and select Upload.

Note: You can select one or multiple files to upload at a time. Drag and Drop is also supported.

Files uploaded from the left will be saved into the selected directory on the right.
